Speaker My name is Jerry Denny. I'm the founder and CEO of Sales Tax Helper. Sales Tax Helper is a team of sales tax lawyers, CPAs, and tax professionals with the goal of helping businesses of all sizes all over the country. We exist to be the great equalizer, ensuring government intimidation never erases years of grit and sacrifice. Every day, our company fights bureaucracy to protect what business owners that work so hard to build. I grew up in a small family business. I learned that having a business is both a precious and brutally difficult endeavor, and being an entrepreneur is made even tougher when you have to deal with aggressive and many times unreasonable state governments like state taxing agencies. Anytime you get a chance to beat up the bully, it just makes it that much sweeter. The traditional law firm or accounting firm has an hourly arrangement that it's take it or leave it type approach. We leave it to the business to decide what they need and what they want from us. Our platform is designed by sales tax lawyers, and it provides our clients, customers, user with curated content and videos to help them resolve their sales tax problems. The user has the opportunity to use our resources and guides to get answers to their questions. But if they need a little bit of help along the way, they have access to our team of lawyers and CPAs to help them solve a problem. Before we were working in sales Tax Helper, we just didn't know what we didn't know. It's all kind of a black box. The fear was, am I risking my business? Now that we've worked with sales tax Helper, even though I have a two and a half year old, I still sleep much better at night than I did before. Knowing that we're doing things correctly and approaching things the right way obviously gives us a lot of comfort as a business, and it also helps us operate with more velocity. I think there is always an element of people are looking for different things in different situations. But for most entrepreneurs who are looking for anywhere from entry level help to high level help, that is looking for a company and people who think like them. As entrepreneurs, I definitely recommend working with sales Tax Helper. We are in construction management providing site safety management to New York City contractors doing high rise buildings. We were contacted by New York State Sales Tax Division that they want to perform an audit. We knew that we are not liable to pay sales taxes. We needed a professional representation, so that's why we contacted sales tax. We feel confident. We feel that we are presented properly and that relieves a lot of stress and anxiety. So we can concentrate on our day to day duties and services, which we provide to the contractors and developers in the city. Don't give up the fight and contact sales tax helper from New York to LA or Miami to Seattle. No matter where your sales tax issue may be, Sales Tax helper is your partner for your sales tax needs.
